Resume summary:

Web Developer with five years of experience in developing websites on WordPress utilizing HTML, CSS, and JavaScript. Has developed over 30 websites and launched over 200 websites, enhancing website conversion rates by 20% through expertise in UX/UI, marketing, and graphic tools such as Figma, Photoshop, and Illustrator. Recently completed a Full-Stack Web Development program, further honing skills in React, React Native, TypeScript, Angular, Node.js, and advanced JavaScript. Actively seeking opportunities to contribute to innovative projects and advance as a Front-End Developer in the logistics, construction, or equipment rental technology sectors.

Web development projects:

Meet App
Study project, CareerFoundry, Febr 2024 - Mar 2024
- Developed a React-based PWA with offline capabilities, using TDD and BDD for a vseamless user experience.
- Integrated Google Calendar API for event filtering by city, enhancing user personalization and engagement.
- Implemented AWS Lambda for secure OAuth user authentication and authorization, ensuring scalability and high security.
- Ensured 100% test coverage with Jest, Gherkin, and Puppeteer, achieving a bug-free and reliable app.

→ GitHub repository

Movie App
Study project, CareerFoundry, Mar 2024 - May 2024
- Engineered a movie web application with distinct server-side & client-side components:
- Developed a RESTful API using Node.js, Express, MongoDB, and Mongoose, ensuring secure user authentication, CRUD operations, and endpoint testing with Postman.
- Crafted a Single-Page Application (SPA) using TypeScript and Angular for responsive user interactions such as registration, login, and profile management.
- Enhanced the app with React, React Bootstrap, and React Router for a secure, platform to manage movie details, supported by JWT authentication and password hashing.
- Achieved a fully operational, bug-free application that allows users to interactively view movie details, select favorites, and manage their profiles effectively.
